PROFESSIONAL PROFILE

Frontend developer with production experience at PulsifyAI, building public websites and redesigning application interfaces as the sole frontend developer within a team. Completed a two-year Web Development programme at ETIC Algarve; applying for Year 3 entry into Software Engineering at Teesside University.

EXPERIENCE

PulsifyAI | Frontend Development Intern

29 June 2026 - Present

- Built pulsifyai.com from scratch using React, JavaScript, Three.js and WebGL shaders, translating the CEO's section requirements into the finished frontend.
- Designed and built labs.pulsifyai.com; redesigned the ImoCoach application, admin interface and public landing page.
- Redesigned a confidential internal application while preserving familiar workflows; improved navigation, forms, table readability and copy actions.
- Adapted interfaces for desktop, tablet and mobile and tested functionality manually.

Kapta | Backend Developer Intern

April - July 2022

Assisted in API development and database management, gaining experience with server-side logic and real-world development workflows.

SELECTED ACADEMIC PROJECTS

Stone Saints - Individual storefront project. Built a clothing and jewellery website with Stripe and Google sign-in integration. Public demo available; payments and Google sign-in are currently disabled. stonesaints.vercel.app

SmartFlow - Second-year team project. Contributed frontend pages and backend functionality to a two-person prototype exploring traffic priority for emergency vehicles.

EDUCATION

ETIC Algarve - Web Development · Two-year programme completed July 2026.

Teesside University - Software Engineering · Applying for Year 3 entry.

Escola Secundária de Albufeira · 2019-2022
